## Nonpoint Source (NPS) Management Program Plan - Why Write It?

- Foundation of the Tribe's NPS Program.
- Provides a roadmap for future natural resource management actions on tribal lands.

2

## Nonpoint Source (NPS) Management Program Plan - What Is It?

- A multiyear strategy document
- Describes how the Tribe will address problems identified in the NPS Assessment Report
- Identifies projects to implement management practices for NPS pollution prevention
- Identifies working relationships (*tribal government, other agencies etc.*)

3

## Management Measures (MM)

- Activities used to prevent or mitigate impacts to water quality
- MM can be structural or nonstructural

4

## MM Structural Examples

- Fencing riparian areas—keep livestock out of riparian areas
  - This practice reduces sloughing of stream bank soils due to hoof and head action
  - Streamside vegetation and natural stream bank angles, width, depth, and undercut are maintained

5

## MM Structural Examples (continued)

- Vegetated filter strip
- Streambank restoration
- Culvert removal

## MM Structural Examples (continued)

- Site cleanup
- Road decommissioning
- Gabions
- Silt fence
- Infiltration basin

7

## MM Nonstructural Examples

- Planning and Zoning Codes
- Permit Requirements
- Education and Community Outreach
- Conservation Easements
- Farming Practices e.g. Contour Farming, Crop Rotations

## Management Program (continued)

Identify any additional, long-term objectives for the NPS category

Examples include:

- Participate in regional planning efforts that can impact Tribal lands
- Pursue land acquisitions
- Pursue funding from USDA cost share programs
- Restore minimum flows and regulate impoundments
- Develop ordinance for clustered urban development
